SUMMARY

Data & AI Consultant and MSBA graduate with a strong foundation in Cloud Engineering, Generative AI, and enterprise strategy. Proven experience designing cloud-based solutions and developing proof-of-concepts utilizing agentic AI, RAG, and multi-agent workflows. Combines deep business acumen with technical proficiency in Python, SQL, and GCP to translate complex business problems into scalable, AI-powered digital transformations.

TECHNICAL SKILLS

- **Data & AI Consulting:** Agentic AI, Multi-Agent Workflows, Prompt Engineering, Retrieval-Augmented Generation (RAG), LLMs
- **Cloud Engineering & Analytics:** Google Cloud Platform (GCP), PySpark, Python (pandas, scikit-learn), SQL (BigQuery, DuckDB)
- **Development & MLOps:** Agile Cycles, Docker, Cloud Run, ETL, Proof-of-Concept (PoC) Prototyping, Drift Monitoring, Git
- **Business Acumen:** Technology Advisory, Storytelling & Client Presentations, Business Analytics, ROI & Risk Analysis.

PROFESSIONAL EXPERIENCE

Community Dreams Foundation (Skills-Based Volunteer) | Sebring, FL
Business Data Scientist | July 2026 – Present
Project: Elpsan Bio (Healthcare Analytics & Predictive Modeling)

- Analyzed complex business problems and developed analytical prototypes to model revenue viability for 15+ FDA drug candidates, delivering a proof-of-concept that filters hundreds of clinical matches into high-ROI targets.
- Structured and communicated technical findings through automated dashboards and storytelling presentations, accelerating go-to-market data retrieval for cross-functional research teams by 15–20%.

Ascend Technology Inc. | Santa Clara, CA
Business Analyst Intern | May 2025 – August 2025

- Analyzed complex enterprise datasets using SQL and Python to develop automated reporting dashboards, streamlining cross-functional workflows and accelerating executive decision-making.
- Collaborated with engineering and product teams in an agile environment to translate business requirements into data-driven digital solutions and identify operational gaps.

Ampere Ltd. | Dhaka, Bangladesh
Lead Data Analyst | January 2019 – October 2023

- Applied business insights and quantitative techniques in Python and R to design seasonal demand forecasting models, successfully generating a 9% revenue lift and reducing overstock by 5%.
- Supported operational and governance re-design by automating financial data pipelines and predictive logistics simulations, mitigating bottlenecks to maintain a 90% fulfillment rate and 10% operating margins.

CLOUD ENGINEERING & AI PROJECTS

Cardiovascular Risk Assessment Assistant | September 2026 – Present | github.com/nmemranhussain/cardio-triage-4-agents
Vertex AI, BigQuery ML, Vector Search (RAG), Multi-Agent Workflows, Streamlit, Docker, Cloud Run

- Developed an enterprise cloud-based solution utilizing a 4-agent workflow and prompt engineering to parse unstructured vitals and predict mortality with SHAP explainability.
- Engineered a RAG architecture for medical guideline retrieval, executing the full agile development cycle to deploy a serverless, containerized application to GCP Cloud Run.

Diabetic Readmission Clinical BI | July 2026 – August 2026 | github.com/nmemranhussain/DiaVigil
DuckDB SQL, Python, XGBoost, Data Visualization (Plotly), Groq API

- Architected a 3-agent AI application to evaluate 30-day readmission risk across 101,700+ patient records, combining data analytics with rapid LLM orchestration.
- Automated SQL data extraction and predictive feature engineering, facilitating client presentations through interactive Plotly data visualizations.

Predictive-RAG Retention Engine | **August 2025 – December 2025** | github.com/nmemranhussain/RAG-Retention
Gemini 2.5 Flash, Cloud Platforms (GCP), PySpark, ChromaDB, LangChain

- Built a proof-of-concept AI retention architecture utilizing Reinforcement Learning (LinUCB Bandits) and Gemini 2.5 Flash on Google Cloud Platform to solve enterprise churn challenges.

EDUCATION & TECHNICAL UPSKILLING

Google Cloud Professional ML Engineer & Agentic Architecture (Candidate) | 2026
MS in Business Analytics | The George Washington University, School of Business | Dec 2025
Masters of Business Administration (MBA) | North South University | May 2023
BSc in Electrical and Electronics Engineering (EEE) | American International University-Bangladesh | Dec 2008
